

## Tech Alert

# AI-Based Poll Suggestions Coming to Microsoft Teams

INTELLIGENT OFFICE

### What is coming soon?

When creating a poll using Microsoft Forms in their Teams meeting, organisers can soon implement AI-based suggestions.

Microsoft Forms intelligence will suggest poll options for organisers to choose from, based on their meeting context and purpose. Forms can also suggest multiple-choice answer options if it suits your chosen poll question.

Polls in Teams meetings has been a built-in feature since 2020 and it is now optimised for mobile users as well as guest users.

### What are the benefits?

AI-based suggestions in polls will provide a more efficient experience for organisers by offering relevant options with a few clicks. This feature update will reduce the time spent creating polls, so the meeting runs smoothly.

More AI-based features coming soon include open-text polls, historical poll suggestions, option suggestions and data reporting for polls after a Microsoft Teams meeting has ended.

**Products:** Microsoft Teams, Microsoft Forms

**Cloud Instance:** Worldwide (Standard Multi-Tenant)

**Release Phase:** General Availability

**Status:** In Development

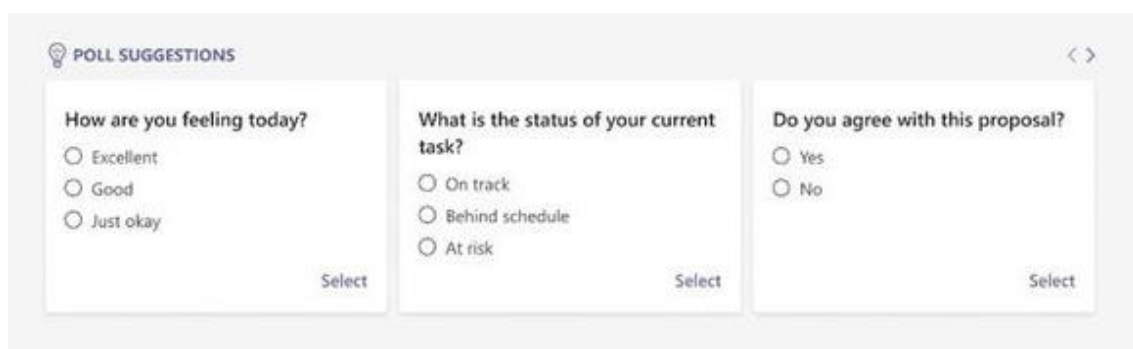

**Release:** April 2021

### What is Microsoft Forms?

Microsoft Forms is an online tool that lets you create surveys, quizzes and polls. You can collect responses and visualise your data in-real time.

Forms can be used within Microsoft Teams and the data can be exported to Microsoft Excel for analysis.

Forms is part of the Microsoft 365 family and is accessible via desktop, mobile and web devices and all browsers.

#### About us

365 Architechs is a technology company based in Brisbane, Australia. We deliver solutions to support organisations on their digital transformation including cloud, modern applications, cybersecurity and artificial intelligence to drive profitability, growth and achievement of strategic objectives.
