

Tech Alert

Chat with Self Feature Coming to Microsoft Teams

MODERN OFFICE

What is new?

Soon, users will be able to send themselves notes, messages, files, and images/videos in a Microsoft Teams chat.

The process of sending yourself a personal chat message will be the same as sending one to another team member.

When available, you will be able to open a new chat, enter your name and type the message to send.

What are the benefits?

This feature update will help users stay organised and quickly take notes without leaving the Microsoft Teams application.

The ability to “chat” with yourself provides an alternative way of storing important notes. This feature also ensures the content is searchable and persistent within Microsoft chat.

What is Microsoft Teams?

Microsoft Teams is the digital teamwork hub for modern businesses, facilitating collaboration with workspace chat, audio and video conferencing, shared file storage and application integration.

Teams is part of the Microsoft 365 family and is accessible via desktop, mobile and web devices.

Products: Microsoft Teams

Cloud Instance: Worldwide (Standard Multi-Tenant)

Release Phase: General Availability

Status: In Development

Release: February 2022
